

What is cross-curricular literacy?

Cross-curricular literacy involves students reading and writing in a variety of subject areas. Through engagement with texts that are specific to subject areas, like science, mathematics, or even music, students learn the vocabulary, genres and discourses that are distinct to them.

Cross-Curricular Literacy Examples

Social Studies

Culture
History
Geography

Science

Astronomy
Biology
Earth Science

Math

Measurement
Symmetry
Fractions

Language Arts

Creative Writing
Expression
Mythology

Languages

World Cultures
Vocabulary
Heritage

Music

Rhythm
Patterns
Orchestra

How LP does it

LiteracyPlanet provides students with subject-specific texts in a variety of genres. These high interest texts help develop students vocabulary in each subject as well as provide knowledge of how to communicate effectively within these subject areas.

Teachers can assign articles in Intrepizine that are specific to subject areas across the curriculum. Students can also learn subject-specific language by using My Words to practice those words and acquire them in their vocabulary.
