LiteracyPlanet's
Literacy Check

What is the Literacy Check?

The Literacy Check helps educators quickly and easily...

See student proficiency   **Identify learning levels**   **Target literacy needs**

The Literacy Check is a simple literacy test that is mapped to LiteracyPlanet's Literacy Continuum. It is only short, consisting of 4 - 15 concepts per strand and only takes between 15 - 30 minutes to complete, depending on individual student ability. The check helps educators see how their students are working within each strand of literacy.

How will the Literacy Check help educators?

The Literacy Check provides educators with a snapshot overview of how their students are working within each strand of literacy at a specific learning level. The Literacy Check signifies whether students should be moving up or down a learning level across each strand of literacy, or whether they should continue at their current learning level.

How does the Literacy Check work?

Once the student is assigned a Literacy Check, they will complete a set of questions before proceeding with their learning journey or engaging in other activities. The Literacy Check can be assigned at any time during the student's learning journey.

As students complete the Literacy Check, the report is updated in real-time, giving you instant visibility of individual student proficiency.

LiteracyPlanet's
Literacy Check

Step 1 — Choose Literacy Check

- Log into your LiteracyPlanet account.
- Select "Literacy Check" from the Tools menu.

LiteracyPlanet's Literacy Check

Assign Literacy Check — Step 2

- Choose from the options to assign the Literacy Check to students in your class.*

  *Ensure you have created a class before beginning. If a student has a Literacy Check already assigned, click on the options to unassign.

Class Set Up Page

Step 3 — Complete the Literacy Check

- Get your students to log into LiteracyPlanet and complete the Literacy Check.
- Access their results via the Literacy Check Report in your dashboard or from the Report menu.

Student Literacy Check

Use Data to Differentiate — Step 4

- Use the Literacy Check data to target your students' literacy needs.
- Determine whether they need to remain in, or move up or down a learning level.*

  *Click here to change each student's learning level.
