

## Sight Words

LiteracyPlanet's Sight Words includes both high-frequency words and those that do not follow the rules of the English language. It encompasses the words determined to be essential for early literacy development.

The Sight Word lists have been expanded to comprehensively cover the vocabulary that students need in the early stages of their reading and writing development.

Word lists are sequenced according to the frequency they are encountered when reading. They have also been carefully curated to help students engage with the LiteracyPlanet reading content and comprehension texts that are an essential part of their literacy journey.

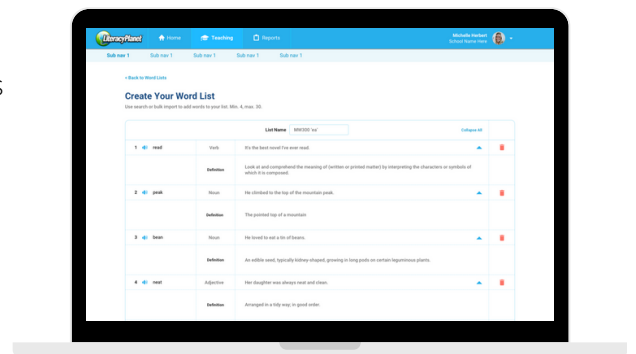

Across the 135 word lists, students learn and practice more than 700 words, all deemed to be helpful in the early stages of learning to read and write, even for older students.

As always, LiteracyPlanet's Sight Words assists students with word recognition, recall, and application through a range of fun and engaging learning experiences. Sight Word lists are automatically delivered to students through their learning journey, and educators may also choose to assign specific lists to meet the learning needs of their individual students.

### Adding your own Sight Word Lists

In addition to using LiteracyPlanet's Sight Words content, teachers can also add their own word lists using the Custom Word List assign tool.

After the student has become proficient with the list entered by the teacher, the student will then continue on the sight words pathway assigned by the program.
